Subject: Microsoft settlement

I don't agree to the proposed settlement of Microsoft Corporation business practices. Vehemently so.

Microsoft Corporation, like an unruly child, must be punished for its actions were fully pre-meditated and planned. To leave Microsoft Corporation without having suffered proper discipline leaves them, again like an unruly child, without any form of censor or control upon further actions in the same vein. Common sense dictates not a draconian but a just discipline so that Microsoft Corporation will learn the error of its ways. Further justice will have been served, the people will have been served and computerization will be allowed to advance freely in an open marketplace to the benefit of us all.

Cordially,

Eugene Bartley
